Dina (Yujie) Da

Product Designer | 0-to-1 Products · Design Systems · Human-AI Interaction

Boston, MA | (339) 242-3404 | dddina7788@gmail.com | Portfolio: dinada.design | LinkedIn: linkedin.com/in/dina-da

SUMMARY

Product Designer who connects design decisions to measurable outcomes — from 0-to-1 AI products to consumer transaction flows for local services. Builds design systems for fast-moving teams and validates through usability testing.

WORK EXPERIENCE

Product Design Intern | The Convenience App, LLC

Jul 2026 - Sep 2026 Marlborough, MA

- **Local services transaction design:** As the company expanded into new local service verticals, used competitive analysis and user personas to shape booking-to-payment flows (pet care, beauty, auto services): discovery, scheduling, price confirmation, in-app payment.
- **Payment interaction:** Built a swipe-to-pay control with custom micro-interactions and responsive feedback; documented component logic for engineering handoff.
- **Pre-launch UX review:** Audited dozens of screens across core transaction flows with founders and engineers, identifying several usability issues and refining key pages before release.
- **Design system & launch:** Aligned leadership on a visual direction through AI-assisted exploration, then built reusable button and icon component systems; designed the new web hero and coupon flows for launch.

UX/UI Designer | VortexNet LLC

Jun 2025 - Dec 2025 Covina, CA

- **0-to-1 AI product:** Led 0-to-1 design for an LLM-powered mock-interview and career-coaching product — from user research and LLM interaction-pattern exploration, through user flows, to a high-fidelity prototype and client delivery.
- **Metrics-driven iteration:** Ran usability tests that lifted task completion from 58.3% to 91.7% — a 33.4 percentage-point increase — with a 4.8/5 satisfaction rating.
- **Conversational UI & handoff:** Designed the conversational UI for AI mock interviews from the ground up, and mapped AI-to-human-mentor handoff flows through reviews with the PM, engineers, design lead, and client.

Digital Experience Designer | GaoFu Foods

Feb 2022 - Jan 2024 Shanghai, China

- **Information architecture:** Restructured the B2B website's IA and content hierarchy with the USA Cheese Guild, lifting traffic 32.2% within three months.
- **Research-driven content:** Built and ran a 300+ creator community as an ongoing research panel — recurring interviews synthesized into actionable insights for content and digital experience.
- **Partner campaigns:** Designed H5 interactive pages and campaign assets for overseas partners and the USA Cheese Guild's joint marketing campaigns.

Digital Experience Designer | 1 Point 3 Acres LLC

May 2020 - May 2021 Seattle, WA

- **Onboarding research & motion specs:** Usability-tested a social discovery app's registration and onboarding flows, and defined reusable visual and motion guidelines with developers for landing pages, splash screens, and animations.

PROJECTS

Product Designer — Capstone Project | Northeastern University

Sep 2026 – Dec 2026 Boston, MA

- **0-to-1 product design:** Leading design for a 30-minute video experience-sharing platform connecting alumni and students — research, surveys, design system, and high-fidelity UI built with AI-assisted workflows (Claude).
- **Stakeholder alignment:** Regular design reviews with university leadership on progress and decisions.

EDUCATION

Master of Professional Studies in Digital Media, Concentration in Applied User Experience Design | Northeastern University
Sep 2024 - Dec 2026 | Boston, MA | GPA: 3.63/4.0

B.A. Multiplatform Journalism, Minor in Public Relations and Advertising | Duquesne University
Aug 2016 - May 2020 | Pittsburgh, PA

SKILLS

Product Design: Interaction Design, Information Architecture, User Flows, Wireframing, Rapid Prototyping, High-Fidelity UI, Design Systems, Component Libraries, Human-AI Interaction, Conversation Design
Research & Validation: Usability Testing, User Interviews, A/B Testing
Tools: Figma, HTML/CSS, Claude Code
